Indigenous and Minority Languages under Siege: Finding Solutions to a Global Threat

Symposium Theme

The Intercultural Human Rights Law Review is an annual publication of intercultural human rights scholarship. Affiliated with the Graduate Program in Intercultural Human Rights, this academic honors society publishes pertinent articles and essays by academics, practitioners, and students. In furtherance of this law review's mission, an annual symposium is organized to provide a forum for people of all walks of life to participate in discussions on human rights. This year's symposium is designed to provide an academic analysis of the pressing issues raised by the alarming loss of languages across the planet. It also presents and evaluates solutions to the problem from both legal and practical perspectives. The symposium will address two primary threats to the global tapestry of cultures, whose vibrancy is inextricably tied to language as the key medium of communication:

1) Indigenous Languages: Rights and Revival

2) Minority Languages: Threats in Comparative Perspective and Protective Regimes
