OF STEM TEACHERS

MASTER OF SCIENCE IN BIOLOGY FOR STEM EDUCATORS

To meet the urgent national priority of educating skilled Science, Technology, Engineering and Mathematics (STEM) professionals, St. Thomas University is offering a Master of Science in Biology for STEM Educators.

This program will help working middle and high school teachers as well as educational professionals strengthen and broaden their STEM content knowledge, expand their skills through laboratory exercises and scientific research, and gain experience utilizing, as well as developing, inquiry-based, hands-on STEM instruction.

Completion of program allows graduates to teach dual enrollment biology courses in high schools, as well as lower level college/university courses in biological sciences.

Be Passionate. Be Inspired. Be a STEM Leader.

- Dual Enrollment Certification for Biology
- Reduced tuition: Cohort rate \$536/credit X 30 credits = \$16,080 for full program
- Eligible for tuition reimbursement from several school districts
- Financial aid and scholarship application assistance available
- Self-paced curriculum can be completed in 15 months
- Blended online and summer on-campus program
- Curriculum aligns with Common Core State Standards and encourages classroom practices that lead to better student test scores
